

# ANIMAL RESOURCES PER DIEM RATES -FY17 (5%) Eff. 8/1/16

For budgeting purposes, Principal Investigators should assume a 5% increase on July 1 of each fiscal year.

Per diems are based on where the animals are housed, not the PI's department.

## ANIMAL PER DIEM RATES

*Per diem* is defined as the expenses required to maintain an animal or cage of mice for any portion of a calendar day. Per diem charges start accruing upon arrival at our facilities.

Animal *per diem* rates are calculated using the Cost Analysis and Rate Setting Manual for Animal Research Facilities, № 00-2006 rev. May 2000 developed and published by the National Center for Research Resources (NCRR) at the National Institutes for Health (NIH).

For budgeting purposes, Principal Investigators should assume a 5% increase on July 1 for each fiscal year.

The listed rates include standard husbandry practices utilizing standard personal protective equipment (PPE), housing type, and biosafety level. Rates for projects requiring additional services (for example strict barrier housing, quarantine, diagnostic laboratory testing, non-standard PPE) may differ significantly and will be charged in addition to standard *per diem rates*. In these cases, it is highly recommended that the user consult with Animal Resources in order to establish a budget.

Rates are subject to review and revision in January and July of each year.

---

## ANIMAL PROCUREMENT

ALL ANIMAL PROCUREMENT MUST BE MADE THROUGH THE UNIVERSITY RESEARCH ANIMAL RESOURCES OFFICE USING THE AnOps SYSTEM ([Anops.UGA.EDU](http://Anops.UGA.EDU))

Animals cannot be ordered until all approvals are completed.  
The average approval rate for FY16 was ~7 days.

### Minimum # of days required for processing & ordering before delivery

Species	Vendor/Source	Lead Time* (Days†)
Mice, Rats, Gerbils, Hamsters	All vendors/sources	5PM on Wed
Cattle, Horses, Swine, Goats, Sheep	All vendors/sources	31
Dogs, Cats, Ferrets, Guinea Pigs, Rabbits	All commercial vendors (Purpose Bred ONLY)	21
All other species	All vendors/sources	Minimum 31

\* Lead time listed above are minimum times (days) needed to procure these animals; contingent upon availability from supplier.

† (Days) = calendar days after all approvals have been obtained and contingent on vendor availability

**Special requests such as time pregnant animals, may require longer lead times.**

**USDA species including Cattle, Horses, Swine, Goats, Sheep, and other hoofstock —**

- The ability to fulfill an order is subject to the availability of these animals from local and purpose bred suppliers. Ordering hoofstock animals should be completed well in advance to ensure the best chance of filling an animal order request.
- All animals must undergo an acclimation period per IACUC policy - <https://research.uga.edu/oacu/>
- Animal costs based on market price for the species or established prices charged by purpose bred vendors
